

David Statue

THE JOHN & MABLE RINGLING MUSEUM OF ART, SARASOTA , FL

At the request of The John & Mable Ringling Museum of Art, the cast bronze copy of Michelangelo's *David* underwent conservation treatment by EverGreene Architectural Arts. *David* sits in a prominent location in the Renaissance-style courtyard of the Museum of Art. The primary aim of the project was to clean, restore the darker original patina, and apply a protective wax coating to the bronze sculpture.
