

## Fisher Building

DETROIT, MI

Built with funds from the sale of Fisher Body to General Motors in 1928, the Fisher Building is an Art Deco masterpiece, located in Detroit, MI. As part of a \$100 million restoration and renovation project, EverGreene restored damage to plaster and decorative finishes in the dome and the highly-decorated lobby plaster ceiling. Work included repair & consolidation of water-damaged plaster and restoration of the Géza Maróti-designed murals and decorative painting. The Fisher Building continues to serve as office and retail space.
