

Folly Theater

KANSAS CITY, MO

The Folly Theater has a colorful history, from originally being a Vaudeville Hall designed by Louis C. Curtis in 1900 and then turning into an adult movie theater in 1974.

EverGreene artists developed a historically sympathetic, sophisticated decorative scheme. We installed an on-site mock-up that allowed us to perform surface testing and color matching. This gave the theater the support to rally donors and kick start the fundraising process. Today the theater offers a wide range of entertainment from jazz to touring companies.
