

Jerome L. Greene Science Center

COLUMBIA UNIVERSITY, NEW YORK, NY

The Jerome L. Greene Science Center is the first building to rise on Columbia University's new 17-acre Manhattanville campus. This nine-story, 450,000-sq-ft center is the largest research building that Columbia has ever built and the biggest academic science building in New York City, along with being home to the Mortimer B. Zuckerman Mind Brain Behavior Institute.

EverGreene was responsible for the installation of two StarSilent acoustic plaster ceilings.
