

Immaculata Church

ST. MARY'S, KS

The magnificent Immaculata Church is an incredible project still underway in St. Mary's, Kansas. EverGreene was hired by The Society of St. Pius X to create concept designs and develop the liturgical artistry program.

During the design process, The Society of St. Pius X was absolutely uncompromising when it came to beauty. Together, we found ways to realize their vision within the budget. We selected colors, designed the capitals, collaborated with the architectural team, construction team, and owners team to realize the program so that our designs reflected their theological vision while also adhering to the practical guidelines such as time, cost, and materials. We assisted in budgeting all of the elements that were produced in-house as well as those that were being made by others.

Our designers drew heavily from historic precedent and direction from the client team. A significant historic precedent for this project was St. Godehard in Hildesheim, Germany. The program in the sanctuary and the dome is based on The Book of Revelation, the only apocalyptic book in the New Testament. These images of the Immaculata in the dome are a cohesive deep meditation on Revelation. The idea is that the book of Revelation unfolds in front of you....
