

New Synagogue Palm Beach

PALM BEACH, FL

EverGreene was invited to work with RAMSA on the New Synagogue of Palm Beach. Our scope of work involved the design and installation of custom decorative wallpaper within the sanctuary and breezeway walls. This project focused on enhancing the aesthetic appeal of the sanctuary with designs inspired by the historic Touro Synagogue. The scope of work included all stages from design development to installation, ensuring a cohesive and high-quality finish that aligns with the synagogue's architectural and cultural significance.

Initial concepts were developed and refined, with subsequent reviews and adjustments to ensure alignment with the overall vision. To verify design details and scale, samples of the proposed wallcoverings were produced, evaluated, and finalized. Once the designs were approved, the prints were completed and delivered to the site for installation, ensuring a precise and professional application

The sanctuary's transformation was achieved through meticulous attention to design detail and precise installation, resulting in a beautifully enhanced interior that reflects the heritage and spiritual ambiance of the space. This project exemplifies the commitment to craftsmanship and the seamless integration of custom wallcoverings into sacred environments.
