

## Campus Decorative Finishes

NYU SCHOOL OF PHILOSOPHY, NEW YORK, NY

EverGreene painted over 60,000 square-feet of the interior and exterior of this six-story New York University building. A 125-foot Genie telescopic boom lift was employed for the painting of the exterior windows. Another interesting feature of the project was the installation of 1/4-inch-thick cork board that was applied to the surfaces of the curvilinear walls and ceiling of the theater. EverGreene installed this alternate acoustical system as part of the architect's specifications, which provided a form of value engineering.
