

St. Anthony's Church

SCHENECTADY, NY

Following a fire that nearly gutted the main body of the church, EverGreene in collaboration with liturgical consultant, Dick Vosko and architect, Lacey Thaler worked to restore the space as well as planning liturgical artwork that honored the historic style of the church.

Fortunately, it was possible to conserve some of the ceiling patterns and medallions within the sanctuary post-fire. Most of the newly created decorative painting was undertaken by EverGreene's Design Studio. This provided a much more cohesive and beautiful liturgical artistry program for St. Anthony's. Additionally, new murals of Saints Anthony and Juan Diego were commissioned to honor the church's Italian roots, as well as, the predominantly Hispanic community it now serves.
