

Temple Emanu-El

NEW YORK, NY

EverGreene was selected as the prime contractor for the two-year phased restoration of the historic interior finishes at Temple Emanu-El in Manhattan. Built in 1929 as the largest synagogue in the world, the home of Reformed Judaism, Temple Emanu-El is a prominent landmark on Fifth Avenue. The architecture combines Byzantine and early Romanesque styles with Moorish-style decoration. EverGreene's scope of work included restoration of decorative painting, plaster, stone, mosaics, stained glass, and ornamental metal in the sanctuary, chapel, and lobby.
